SUMMARY

Full-stack developer building and operating real production systems. Currently running two products with paying clients: a **B2B SaaS for healthcare professionals** (Spring Boot + Angular + Docker + MySQL, active paying client in Montevideo, live since May 2026) and **FrontPet**, an end-to-end commercial platform for a local pet shop in Brazil: product catalog, WhatsApp-based ordering, and online service bookings — architected as a multi-tenant-ready SaaS (Spring Boot + Next.js 16 + React 19 + TypeScript + PostgreSQL 16). Computer Science student at Universidad ORT. Comfortable owning a product end-to-end: database schema, REST API, frontend, Docker, CI/CD with GitHub Actions, and production deploys on Hetzner Cloud. Documents architecture decisions with ADRs.

EXPERIENCE

Founder & Full-Stack Developer — Consultorio Odontológico SaaS

Aug 2025 — Present

Live: neodentalmaster.turnosuy.com

Repo: github.com/sebakhazzaka2/consultorio-odontologico

B2B practice management system for independent health professionals: patients, scheduling, clinical history, treatments and payments. Designed, built, deployed and operated solo for an active paying client.

Full-Stack Developer — FrontPet Commercial Platform

May 2026 — Present

Repo: github.com/sebakhazzaka2/Frontpet

End-to-end commercial web platform for a local pet shop in Santana do Livramento, Brazil: product catalog, WhatsApp-based ordering, and online service bookings. Multi-tenant-ready SaaS foundation with modular monolith backend and server-rendered frontend. Active paying client — delivery milestone: September 2026.
